INSTRUCTIONS FOR SCHEDULE K-39

GENERAL INFORMATION

K.S.A. 79-32,207 provides for an income tax credit for taxpayers who make expenditures during the tax year to plug an abandoned oil or gas well on their land in accordance with the rules and regulations of the Kansas Corporation Commission (KCC). The credit is 50% of the expenditures made during the tax year. If the credit exceeds the income tax liability for the taxable year the expenditures are made, any unused credit may be carried forward until used. The total amount of credits taken by all taxpayers (including any credit carry over) may not exceed \$250,000 in any fiscal year.

An **abandoned oil or gas well** is any well: 1) that the KCC has the authority to plug, replug, or repair because such well is polluting or is likely to pollute any usable water strata or supply, or causing the loss of usable water; 2) on which drilling began prior to January 1, 1970; and 3) that is located on land owned by the taxpayer claiming this credit.

Fiscal Year Credit Limitation. Qualifying taxpayers will receive the credit on a "first come, first serve" basis. The credit will be denied after the statutory fiscal year credit limit of \$250,000 has been reached. However, the amount of credit denied for this reason may be entered on line 10 of the subsequent year's Schedule K-39.

Partnerships and S Corporations: Partners and shareholders should enter on line 5 of Schedule K-39 their proportionate share of the costs incurred this tax year by the partnership or S corporation (enclose computation).

Required Information: Retain copies of the following documents and information with your records, as KDOR (Kansas Department of Revenue) reserves the right to request them as necessary.

- KCC Form CP-4.
- An itemized list of expenses with copies of invoices for plugging costs and the KCC invoice indicating that the Commission has verified the plugging. List the expenses of each well separately.
- If applicable, the KDOR letter of denied credit for line 10.
