General Information on Annualizing

If your income fluctuates or is seasonal, you may be able to lower the amount of one or more required estimated tax installments by annualizing your income. To see if you can pay less for any period, first complete the Estimated Income Tax Worksheet (Form ESW), then complete the Estimated Tax Annualization Worksheet (Form ESA). Complete one column before continuing on to the next. This worksheet annualizes your tax at the end of each period based on a reasonable estimate of your income and deductions from the beginning of the tax year through the end of each period. If you use the annualized income worksheet for any payment due date, you have to use it for all subsequent payment due dates. If you use the annualized income installment method, you will need to include Form ESA with your tax return if you are filing on paper. For additional information on how to pay estimated tax, please visit our website at revenue.mt.gov.

Form ESA Instructions

To figure the amount of each required installment, the worksheet selects the smaller of the annualized income installment or the regular installment (that has been increased by the amount saved by using the annualized income installment method in figuring any earlier installments).

- Line 1 For each period (column), figure your total income including your adjustments to income. Include your share of partnership or S corporation income or loss items for the period.

- Line 6 If you itemized your deductions, multiply line 4 of each column by line 5 and enter the result on line 6.

 - Married filing jointly or head of household: No less than \$3,640; no more than \$8,220
