### **PART I**

List each item of property falling within the parameters listed above. A separate schedule can be included listing all qualifying property.

Grouping of assets by class is also permitted. For example, all 3-year assets, all 5-year assets, etc., may be grouped together. If assets are grouped, the taxpayer is responsible to maintain all records necessary to support how each item was grouped.

Compute the amount of federal depreciation using the bonus depreciation method and the amount of Iowa depreciation using the MACRS method without any bonus depreciation and using a limit of \$25,000 on section 179 property, if applicable.

Total the amount of the federal depreciation in columns E and F and the Iowa depreciation in columns H and I and enter on Part III of the form. The accumulated depreciation amount in columns G and J should include the total amounts of depreciation and section 179 expense for the life of the asset(s).

If you have not sold or disposed of any bonus depreciation property, you may skip Part II of this form.

### **PART II**

For each item of property listed, determine the difference between federal depreciation and Iowa MACRS depreciation used in the computation of federal and Iowa taxable income in prior and current years.

If you sold or disposed of bonus depreciation property this year, and the Iowa depreciation adjustment was applied to the property in any prior years, you must make the applicable depreciation catch-up adjustment to adjust the basis of the property for Iowa purposes.

A separate schedule can be attached listing all qualifying sales or dispositions, and grouping of assets by class is also permitted as described in Part I. Total the amount in column F and enter on Part III of the form.

### **PART III**
