If a fiduciary files a Montana income tax return for estates and trusts electronically, the fiduciary does not need to mail this form to us unless we ask for a copy. When a fiduciary files electronically, the fiduciary represents that an estate or trust has retained the required documents as part of its tax records and will provide them upon the department's request.

General Information on Annualizing

If the income of an estate or trust fluctuates or is seasonal, a fiduciary may be able to lower the amount of one or more required estimated tax installments by annualizing the income. To see if an estate or trust can pay less for any period, first complete the Fiduciary Estimated Income Tax Worksheet (Form ESW-FID), then complete the Fiduciary Estimated Tax Annualization Worksheet (Form ESA-FID). Complete one column before continuing on to the next. This worksheet annualizes the tax at the end of each period based on a reasonable estimate of income and deductions from the beginning of the tax year through the end of each period. If a fiduciary uses the annualized income worksheet for any payment due date, a fiduciary has to use it for all subsequent payment due dates. If a fiduciary uses the annualized income installment method, then include the Form ESA-FID with the estate or trust's tax return if filing on paper.

Form ESA-FID Instructions

To figure the amount of each required installment, the worksheet selects the smaller of the annualized income installment or the regular installment (that has been increased by the amount saved by using the annualized income installment method in figuring any earlier installments).

Line 1 For each period (column), figure the total income including adjustments to income. Include income or loss items from partnerships or S corporations for the period.

Line 2 For each period (column), figure the total income distribution deduction.

Line 6 To compute the tax, use the tax table below.

2015 Montana Individual Income Tax Table									
If Your Taxable Income Is More Than	But Not More Than	Multiply Your Taxable Income By	And Subtract	This Is Your Tax	If Your Taxable Income Is More Than	But Not More Than	Multiply Your Taxable Income By	And Subtract	This Is Your Tax
\$0	\$2,800	1% (0.010)	\$0		\$10,300	\$13,300	5% (0.050)	\$257	
\$2,800	\$5,000	2% (0.020)	\$28		\$13,300	\$17,100	6% (0.060)	\$390	
\$5,000	\$7,600	3% (0.030)	\$78		More Than \$17,100		6.9% (0.069)	\$544	
\$7,600	\$10,300	4% (0.040)	\$154						

For example: Taxable income \$6,800 X 3% (0.030) = \$204.

\$204 minus \$78 = \$126 tax
