Definitions

Archer MSA. An Archer MSA is a trust created or organized in the United States as a medical savings account exclusively for the purpose of paying the qualified medical expenses of the account holder or the account holder's spouse or dependent, in conjunction with a high deductible health plan.

High deductible health plan. A high deductible health plan for 2005 is a health plan—

1. For self-only coverage that has an annual deductible between \$1,750 and \$2,650 or, for family coverage, between \$3,500 and \$5,250.
2. The annual out-of-pocket expenses required to be paid under the plan (other than for premiums) for covered benefits does not exceed—
 - a. \$3,500 for self-only coverage and
 - b. \$6,450 for family coverage.

A high deductible health plan for 2006 is a health plan—

1. For self-only coverage that has an annual deductible between \$1,800 and \$2,700 or, for family coverage, between \$3,650 and \$5,450.
2. The annual out-of-pocket expenses required to be paid under the plan (other than for premiums) for covered benefits does not exceed—
 - a. \$3,650 for self-only coverage and
 - b. \$6,650 for family coverage.

Previously uninsured account holder. An account holder is considered to be previously uninsured if the account holder's coverage under a high deductible health plan did not begin before July 1, 1996, and

- **For self-only coverage**, the account holder had no health plan coverage at any time during the 6-month period before coverage under the high deductible health plan began or
- **For family coverage**, both the account holder and the account holder's spouse had no health plan coverage at any time during the 6-month period before coverage under the high deductible health plan began.

If an account holder has family coverage and either the account holder or the account holder's spouse was insured at any time during the 6-month period before coverage under the high deductible health plan began or the coverage began before July 1, 1996, the account holder is not considered previously uninsured.

An account holder is considered previously uninsured even if the account holder had any health plan coverage listed below.

1. Insurance, if substantially all the coverage provided under such insurance relates to:
 - a. Liabilities incurred under workers' compensation laws,
 - b. Tort liabilities, or
 - c. Liabilities relating to ownership or use of property.
2. Insurance for a specified disease or illness.
3. Insurance paying a fixed amount per day (or other period) of hospitalization.
4. Coverage (whether through insurance or otherwise) for accidents, disability, dental care, vision care, or long-term care.

Excludable account holder. A married account holder is considered an excludable account holder if all three of the following apply.

1. The account holder is not considered previously uninsured.
2. The account holder opens an Archer MSA.
3. The account holder's spouse has or had an Archer MSA and was **not** considered previously uninsured.

If you simultaneously open an Archer MSA for a husband and an Archer MSA for his wife and neither is considered previously uninsured, treat either the husband or the wife, but not both, as an excludable account holder.
