If your business income is from both in Kansas and outside of Kansas you will need to complete a Kansas business income apportionment schedule to calculate the total of all your business income that is apportioned to Kansas (this may have already been completed at the business level). You may use the Kansas Corporation Apportionment Schedule, K-120AS, for the calculation. Visit our website at ksrevenue.org for more information on apportioning Kansas business income. This must be done before apportioning the PEAK qualified business income derived for the qualified business relocated to Kansas.

LINE 8: To determine your PEAK qualified business income apportionment factor you will need to complete the Qualified Company Apportionment Schedule, PART D. See instructions for PART D.

LINE 10: Enter the percentage that represents your proportionate share in the partnership, S corporation, LLC or LLP. All other taxpayers: Enter 100%.

LINE 11: Multiply line 9 by line 10. This will be the owner’s share of income.

LINE 12 – Use amount on line 11 and the tax computation schedule provided to calculate the Kansas tax liability attributed to the income of the qualified business. Enter result on line 12.

LINE 13: Multiply line 12 by 95%. This is your share of the Owners PEAK credit.

LINE 14: Your Kansas tax liability after *any other states’ tax credit(s)*. From your Form K-40, subtract lines 13 and 14 from line 12 and enter result.

LINE 15: Total credit. Enter amount from line 13 or line 14, whichever is less. Also enter this amount on line 15 of Form K-40.

PART D – QUALIFIED COMPANY APPORTIONMENT SCHEDULE (QCAS)

To determine the business income attributable to the business activity conducted at the qualified business relocated to Kansas, the business income determined in PART C, line 7 must be multiplied by a three-factor formula comprised of the PEAK location Kansas property, payroll and sales factors divided by total Kansas property, payroll and sales factors.

The **property factor** is a fraction, the numerator of which is the average value of the company’s real and tangible personal property owned or rented and used during the tax period at such relocated facility, office, department or other relocated operation in Kansas, and the denominator of which is the average value of the company’s real and tangible personal property owned or rented and used within this state during the tax period. (Rented property is equal to the sum of; total rented property at the beginning of the year plus total rented property at the end of the year divided by 2. Multiply the result of this by 8.)

The **payroll factor** is a fraction, the numerator of which is the total amount paid during the tax period by the company for compensation at such relocated facility, office, department or other relocated operation in Kansas, and the denominator of which is the total compensation paid by the company in this state during the tax period.

The **sales factor** is a fraction, the numerator of which is the total sales of the relocated facility, office, department or other relocated operation in this state during the tax period, and the denominator of which is the total sales of the company in this state during the tax period.
