INSTRUCTIONS FOR SCHEDULE K-82

GENERAL INFORMATION

K.S.A. 79-32,251 provides a tax credit against the Kansas income tax liability of a taxpayer who makes a *qualified investment* in *storage and blending equipment* installed at a fuel terminal, refinery or biofuel production plant for tax years beginning after December 31, 2006 and before January 1, 2012. The credit is 10% of the taxpayer's qualified investment on the first \$10,000,000 invested, and 5% of the taxpayer's qualified investment that exceeds \$10,000,000. The credit will be taken in ten (10) equal, annual installments, beginning with the year in which the taxpayer places into service the storage and blending equipment.

Before making a qualified investment, a taxpayer shall apply to the Kansas Secretary of Commerce to enter into an agreement for a tax credit. After receipt of such application, the secretary may enter into an agreement with the applicant for a storage and blending equipment credit if the secretary determines that the taxpayer's proposed investment satisfies the requirements.

If the credit allowed exceeds the investor's tax liability in any one taxable year, the amount of the credit that exceeds the tax liability may be carried forward until the total amount of the credit is used, except that no such tax credit shall be carried over for deduction after the 14th taxable year after the taxable year in which the first annual installment is allowed.

Expenditures used to qualify for this credit shall not be used to qualify for any other type of Kansas income tax credit.

Biofuel means fuel made from organic matter, including solid and liquid organic waste, but excluding fuel made from oil, natural gas, coal or lignite, or any product thereof.

Fuel terminal means a fuel storage and distribution facility which is supplied by motor vehicle, pipeline or marine vessel and from which motor fuels may be removed at a rack. "Fuel terminal" does not include any facility at which motor fuel blend stocks and additives are used in the manufacture of products other than motor fuels and from which no motor fuels are removed.

Qualified investment means expenditures made for purchase, construction or installation of storage and blending equipment.

Refinery means an industrial process plant, located in this state, where crude oil is processed and refined into petroleum products.

Storage and blending equipment means equipment used for storing and blending petroleum-based fuel and biodiesel, ethanol or other biofuel and is installed at a fuel terminal, refinery or biofuel production plant. *Storage and blending equipment* does not include equipment used only for denaturing ethyl alcohol.

SPECIFIC LINE INSTRUCTIONS
