Who needs to file and pay estimates:

Every individual or married couple filing a joint Iowa return that expects to have a tax liability of \$200 or more from income not subject to withholding.

Each individual required to make estimated payments must file an estimated payment under his/her name and Social Security number.

Due dates:

If any date falls on a weekend, federal holiday, or legal holiday as defined in Iowa Code section 4.1(34), substitute the next regular business day.

For fiscal year filers, the dates for paying the estimated tax are the last day of the fourth, sixth, and ninth months of the fiscal year, and the last day of the first month of the next fiscal year.

How to compute estimated taxes:

Compute estimated tax by using one of the following methods:

- Pay 5% of the anticipated Iowa gross income; or
- Pay 100% of the prior year's Iowa tax liability from IA 1040, line 53, less applicable credits; or
- Pay 110% of the prior year's Iowa tax liability from IA 1040, line 53, less applicable credits, if prior year's federal adjusted gross income plus any bonus depreciation adjustment/section 179 from IA 1040, line 14 and all other Iowa net income decoupling, exceeded \$150,000; or
- Complete the traditional worksheet provided on page 2.

Overpayment credit:

If you had a refund on your 2020 Iowa income tax return and elected to apply it as a credit to your estimated tax, the amount is automatically posted as an estimated credit for 2021. Use the Estimated Tax Payment Schedule to record and apply the credit. If the credit equals or exceeds the first estimated payment, do not send an estimated voucher until a payment is due.

Amending estimated tax:

If your income changes during the year, adjust the estimated tax for the remaining quarters accordingly.

Underpayment of estimated tax:

A penalty for underpayment of estimated tax may apply if sufficient estimated payments are not submitted, regardless of the computation method used in calculating the estimated tax liability. Please see IA 2210 form for penalty exceptions.

EXCEPTIONS:**Nonresidents:**

Iowa law provides that nonresidents whose income from Iowa sources is other than wages have the option of having Iowa income tax withheld or paying estimated income tax. If paying estimated tax is preferred, a release from withholding must be obtained prior to receipt of income. Complete the Nonresident Request for Release from Withholding form (44-017). To obtain this form, see the Department's Website. Submit the form with the tax payment and installment voucher to the Department at the address on the voucher. A release may then be furnished to the payer from the Department, based on the information provided.

Farmers and Fishers:

If 2/3 or more of estimated gross income is from farming or commercial fishing, two additional options are available:

- Pay the estimated tax in one payment on or before January 17, 2022, and file the Iowa income tax return by May 2, 2022; or
- File the Iowa income tax return and pay the tax due in full on or before March 1, 2022.

Those qualifying to make fewer than four estimated payments should use the installment voucher for the quarter from which the Iowa-source income was generated.

Low income exemption from tax:

Taxpayers 65 years of age or older: You are exempt if: (1) You are single and your net income is \$24,000 or less, or (2) Your filing status is other than single and your combined net income is \$32,000 or less. Only one spouse must be 65 or older to qualify for the exemption.

Taxpayers under 65 years of age: You are exempt if: (1) Your net income is less than \$5,000 and you are claimed as a dependent on another person's Iowa return, or (2) You are single and your net income is \$9,000 or less and you are not claimed as a dependent on another person's Iowa return, or (3) Your filing status is other than single and your combined net income is \$13,500 or less.

Note: The amount of any pension exclusion (except military retirement pay), Reportable Social Security Benefits, and Lump-Sum Tax distributions of taxable income must be added back to net income for purposes of determining the low income exemption regardless of age.

If opting to use one of the methods other than the traditional worksheet, proceed to number 21 of the traditional worksheet under "Quarterly Estimated Tax Computation."

Estimated Tax Payment Schedule

Date	A Computed Installment	B	C
		Refund Carryforward/ Prior Period Overpayment	Amount to be Paid (column A less column B)
Installment 1 06/01/2021			
Installment 2 06/30/2021			
Installment 3 09/30/2021			
Installment 4 01/31/2022			

Example on how to compute estimated tax: The taxable income is \$24,000.

The calculation = \$439.11 + [5.63% x (\$24,000 - \$15,084)].

The result = \$439.11 + \$501.97 = \$941.08. Round to the nearest dollar = \$941.00
