Follow the specific schedule instructions for how to enter your credits on your Schedule 1299-C, 1299-D or 1299-A.

What if I have more credits than space allows on the form?

For several credits, you may have more qualifying items than space provided. For any of these credits in which you exceed the allotted space to calculate the credit, use a separate sheet in the same format and include the individual amounts from multiple sheets and the total from the worksheet in these instructions on the line for each credit on Schedules 1299-C, 1299-D, or 1299-A. **Do not enter the total on your additional sheets.**

For example, if you have more than three qualifying properties for the Enterprise Zone Investment credit, use an additional sheet in the same format provided on the Enterprise Zone Investment credit Worksheet. Add the totals from the worksheet and the additional sheets and enter the total on Schedules 1299-C or 1299-A, Column E, or Schedule 1299-D, Column F, for your Enterprise Zone Investment credit.

Schedules K-1-P are required as support for any credit being claimed that was distributed to the claiming entity by a partnership or S corporation.

Additionally, if you receive more than one Schedule K-1-P for any eligible credit, add the amounts from all Schedules K-1-P for that credit and enter the total in

- Column F, Distributive Share Credit from K-1-P, on the corresponding line of Schedule 1299-A,
- Column F, Distributive Share or Transfer, on the corresponding line of Schedule 1299-C, or
- Column G, Distributive Share Credit from K-1-P, on the corresponding line of Schedule 1299-D

Specific Instructions

These instructions and worksheets are to be used to determine the amount of credit to list on your Schedule

- **1299-A, Column E** for credits earned in the current year.
- **1299-C, Column E** for credits earned in the current year and credits carried forward from past years. Use a separate line on Schedule 1299-C for each tax year in which a credit was earned or is being carried.
- **1299-D, Column F** for credits earned in the current year.

See the instructions for the specific Schedule 1299 you are filing for additional information.

Each credit has a four-digit code used to identify it on Schedule 1299-C, 1299-D, or 1299-A. The first digit of the code indicates how many years the credit can be carried forward. For example, all credits that can be carried forward two years start with “2”. The remaining three digits are the unique indicator for that specific code. Ten year carry forwards will use two digits for the year and two digits as the unique indicator. Credit codes that start with “0” cannot be carried forward.

If you earn more than one of the same eligible credit code with the same expiration date, you should add the amounts from all of that credit code when calculating the credit earned in the current year.

■ Enterprise Zone Investment (Credit Code 5080)

[35 ILCS 5/201\(f\)](#)

“Qualified property” is property that

- is tangible, whether new or used, including buildings and structural components of buildings;
- is depreciable according to Internal Revenue Code (IRC) Section 167;
- has a useful life of four or more years as of the date placed in service in Illinois; and
- is acquired by purchase as defined in IRC Section 179(d).

Qualified property can be new or used but does not qualify for the Enterprise Zone Credit if it was previously used in Illinois in a manner that qualified for that credit or for the Replacement Tax Investment Credit on Form IL-477, Replacement Tax Investment Credits. Qualified property includes buildings and structural components of buildings that are real property. It does not include land or improvements to real property that are not a structural component of a building, such as landscaping, sewer lines, local access roads, fencing, parking lots, and other appurtenances.

Any improvement or addition made on or after the date the enterprise zone or river edge redevelopment zone was designated, or on or after the date the business was designated as a high impact business, is considered to be qualified property to the extent that the improvement or addition increases the adjusted basis of the property previously placed in service in Illinois and otherwise meets the requirements of qualified property.

For taxable years ending on or after July 1, 2006, you may take this credit if you

- placed qualified property in service in an Illinois enterprise zone within the tax year,
- placed it in service on or after the date the zone was officially designated as an enterprise zone, and
- continued to use the qualified property on the last day of your tax year.

Using the worksheet below and these instructions, figure your Enterprise Zone Investment credit to enter on your Schedule 1299.

Column A – Describe each item of qualified property you placed in service in an Illinois enterprise zone.

Column B – Enter the month and year each item of qualified property was placed in service in Illinois. An item is placed in service on the earlier of

- the date the item is placed in a condition or state of readiness and availability for its specifically assigned function, or
- the date the depreciation period of the item begins. (Generally, this will be the same date the item is placed in service for purposes of the federal depreciation deduction.)

Column C – If you are using the federal accelerated cost recovery system (ACRS) to depreciate the property, enter the ACRS class assigned to each item of qualified property. Property assigned to an ACRS class of less than four years is not qualified.

If you are not using the ACRS method to depreciate the property, enter the useful life assigned to the property for federal depreciation purposes. The useful life of the property when placed in service must be four or more years to qualify.

Column D – Indicate whether each item of qualified property is new or used. If the property was previously used, enter the abbreviation of the state where the property was located. If you are filing Schedule 1299-D or 1299-A and the property was previously used in Illinois, but not in a manner that qualified for this credit or for the Replacement Tax Investment Credit on Form IL-477, maintain a statement in your records to provide upon request.

Column E – Enter the name of the enterprise zone in which the property is used.

Note: *Qualified enterprise zones are listed on the [DCEO website](#).*

Column F – For each item of property, enter the basis used to figure the depreciation deduction for federal income tax purposes. Generally, the basis will be the purchase price, plus any capital expenditures, minus any rebates and IRC Section 179 deductions. The basis is not reduced by depreciation, including bonus depreciation, except depreciation you were allowed to claim before the date you placed it in service in Illinois, or in an Illinois enterprise or river edge redevelopment zone.

Column G – If you placed property in service in an enterprise zone, the credit rate is .005.

Column H – Multiply each entry in Column F by the amount in Column G, and enter the result in Column H.

Line 4 – Follow the instructions on the worksheet.

You may take this credit if you have certain qualifying expenses for increasing qualified research activities in Illinois. You may **not** take this credit for the following types of activities:

For taxable years beginning on or after January 1, 2023, eligible educators can claim a credit up to \$500 for qualified expenses paid in the current taxable year. If married, filing jointly, and both taxpayers were eligible educators, the maximum credit is \$1000.

DEFINITIONS

“Eligible educator” is a kindergarten through twelfth grade teacher, instructor, counselor, principal, or aide in a qualified K-12 school for at least 900 hours during a school year.

“Materials and supplies” are instructional materials or supplies designated for classroom use in any qualified school.

“Qualified expenses” include ordinary and necessary expenses paid in connection with books, supplies (including nonathletic supplies for courses of instruction in health or physical education), equipment (including computer equipment, software, and services), and other materials used in the classroom. An ordinary expense is one that is common and accepted in your educational field. A necessary expense is one that is helpful and appropriate for your profession as an educator. An expense does not have to be required to be considered necessary.

NOTE: Qualified expenses do not include expenses paid for instruction in a home school.

“Qualified school” is a public school or non-public school located in Illinois.

Note: Home schools are not qualified schools.

Using the worksheet on Schedule 1299-C and the instructions below figure your K-12 Instructional Materials and Supplies credit.

If you are an eligible educator and you paid amounts for instructional materials and supplies during the taxable year, complete all lines in Column A. If you file a joint return, and your spouse is an eligible educator who paid amounts for instructional materials and supplies during the taxable year, complete all lines in Column B.

Line 11a - Enter the Professional Educator License number, if applicable. If not applicable, enter “N/A”.

Line 11b - Enter the name of the Illinois school where the taxpayer or spouse was employed as a teacher, instructor, counselor, principal, or aide for at least 900 hours during the school year.

■ Adoption (Credit Code 5780) (Form IL-1040 filers only)

[35 ILCS 5/227](#)

For tax years ending on or after December 31, 2018, and tax years beginning prior to July 12, 2024, if you have qualified adoption expenses in the course of adopting an eligible child, you are entitled to the Adoption credit in the amount equal to the amount of the federal adoption tax credit received subject to the limitations detailed in Part 2. DO NOT include any federal carryover when determining the amount of federal adoption tax credit received. An eligible child is any individual who has not attained age 18, or is physically or mentally incapable of caring for himself or herself. The credit is allowed

- in the case of any expense paid or incurred before the taxable year in which the adoption becomes final, for the taxable year following the taxable year during which the adoption expense is paid or incurred, or
- in the case of an expense paid or incurred during or after the taxable year in which the adoption becomes final, for the taxable year in which such expense is paid or incurred.

No credit will be allowed for any expense for which funds are received from any Federal, State or local program. Spouses filing a joint return are considered one taxpayer. For nonresidents and part-year residents, the amount of credit shall be in proportion to the amount of income attributable to this state.

Using the worksheet on Schedule 1299-C, Step 2, and the instructions below, figure your Adoption credit. Attach additional pages in the same format, if you are claiming the Adoption credit for more than three children.

Part 1 - Adopted Child Information - For each eligible child you are adopting or have adopted and are claiming qualifying adoption expenses, enter the name, identifying number (Social Security number, ITIN, etc.), birth date (month and year) and check the appropriate box(es)

- if the adopted child is an Illinois resident at the time the expenses are paid or incurred.
- if the adoption is final during this tax year.

Part 2 - Figure Your Credit - The total amount of qualified adoption expenses allowed as a credit shall not exceed \$2,000 (\$1,000 in the case of married filing separate return). However, the credit allowed increases to \$5,000 (\$2,500 in the case of a married filing separate return) if the adoption is of an eligible child who is at least one year old and resides in Illinois at the time the expenses are paid or incurred.

Note: When qualified adoption expenses are reported over multiple tax years for the adoption of the same child, any amount of Illinois Adoption credit previously received for this child must be included on your Schedule 1299-C, Part 2, Line 16b, Adoption Credit worksheet. Your total adoption credit for all tax years may not exceed the maximum allowable credit for the adoption of that child.

Line a - Enter the maximum credit allowed based on the above description.

Line b - Enter the amount of any adoption credit previously claimed on an Illinois return for the same child. The maximum credit on Line a is for the entire adoption of that child, no matter how many years the adoption takes to complete.

Line c - Follow the directions on the worksheet.

Line d - Enter the qualified adoption expense you paid or incurred (usually, Line 5 of federal Form 8839, Qualified Adoption Expenses) where qualified adoption expense means any reasonable and necessary adoption fees, court costs, attorney fees, and other expenses which are

- directly related to, and the principal purpose of which is, the legal adoption of an eligible child by the taxpayer,
- not incurred in violation of State or Federal law or in carrying out any surrogate parenting arrangement,
- not expenses in connection with the adoption by an individual of a child who is the child of such individual's spouse, and
- not reimbursed under an employer program or otherwise.

Line e - Follow the directions on the worksheet.

Line f - Total all columns of Line e and enter the result here.

Line g - Follow the directions on the worksheet.

Line h - Follow the directions on the worksheet. Enter the total in Column E of your Schedule 1299-C, Step 3, on the line that you enter "5" in Column A and Credit Code 5780 in Column B.

Attach: You must attach a copy of Federal Form 8839, Qualified Adoption Expenses, to your Form IL-1040, if you enter an Adoption credit amount on Schedule 1299-C.

This credit is not distributable or transferable.
